	Urgent	Not urgent
Important	Do - MVP - Time study sessions and record subjects - Based on study sessions (time and subject) along with completed sets, calculate rewards. - Create a spending system/inventory and allow us to spend earned points on flowers/decorations.	Schedule - Create a visual representation of the garden to display purchased decor. - Add study streaks + achievements - Add graphs so represent streaks+achievements for users to interact with.
Not Important	Delegate - Use java.time in order to track how long each study sesh is - Java.util.scanner for terminal input - java.io for reading + saving data to txt files.	Delete - No multiplayer options - No in game purchase using real currency - No interacting with other users/chatting
